## Units of Measure Used in Canada

| Metric units |  |  |
| :--- | :--- | :--- |
| unit | measure of | symbol |
| ampere | electric current | A |
| becquerel | radioactivity | Bq |
| coulomb | electric charge | C |
| degree Celsius | temperature | ${ }^{\circ} \mathrm{C}$ |
| hectare | area | ha |
| hour | time | h |
| joule | energy | J |
| kilogram | mass | kg |
| litre | volume or capacity | L |
| metre | length | m |
| minute | time | min |
| newton | force | N |
| ohm | electric resistance | $\Omega$ |
| pascal | pressure | Pa |
| second | time | s |
| tonne | mass | t |
| volt | electric potential | V |
| watt | power | W |
| watt hour | electrical energy | Wh |
|  |  |  |

## Conversion Factors

## Metric prefixes

| name | symbol | multiply by... |
| :--- | :--- | :--- |
| micro- <br> milli- <br> centi- | $\mu$ | 0.000001 |
|  | m | 0.001 |
| kilo- | c | 0.01 |
| mega- <br> exa- | k | 1000 |
|  | M | 1000000 |
|  | E | $10^{18}$ |

## Units of length

## Metric conversions

| $1 \mathrm{~cm}=10 \mathrm{~mm}$ | $1 \mathrm{~mm}=0.1 \mathrm{~cm}$ |
| :--- | :--- |
| $1 \mathrm{~m}=100 \mathrm{~cm}$ | $1 \mathrm{~cm}=0.01 \mathrm{~m}$ |
| $1 \mathrm{~km}=1000 \mathrm{~m}$ | $1 \mathrm{~m}=0.001 \mathrm{~km}$ |

$1 \mathrm{~m}=100 \mathrm{~cm}$
$1 \mathrm{~m}=0.001 \mathrm{~km}$

## Imperial conversions

1 foot $=12$ inches
1 yard $=3$ feet $\quad 1$ yard $=36$ inches
1 mile $=1760$ yards $\quad 1$ mile $=5280$ feet
Imperial to metric
Metric to imperial
1 inch $=2.54 \mathrm{~cm}$
$1 \mathrm{~cm} \doteq 0.3937$ inch
1 foot $=30.48 \mathrm{~cm} \quad 1 \mathrm{~m} \doteq 39.37$ inches
1 foot $=0.3048 \mathrm{~m} \quad 1 \mathrm{~m} \doteq 3.2808$ feet
1 mile $\doteq 1.6093 \mathrm{~km} \quad 1 \mathrm{~km} \doteq 0.6214$ mile
multiply by... 0.000001

0.01

1000
$10^{18}$

| Other units |  |  |
| :---: | :---: | :---: |
| unit | measure of | abbreviation or symbol |
| acre | area | - |
| degree Fahrenheit | temperature | ${ }^{\circ} \mathrm{F}$ |
| foot | length | ft . or ${ }^{\prime}$ |
| fluid ounce | volume or capacity | fl. oz. |
| gallon | volume or capacity | gal. |
| inch | length | in. or ${ }^{\prime \prime}$ |
| mile | length | mi. |
| parts per million by volume | gas concentration | ppmv |
| pint | volume or capacity | pt. |
| pounds per square inch | pressure | psi |
| quart | volume or capacity | qt. |
| yard | length | yd. |

## Units of volume or capacity

## Metric conversions

$1 \mathrm{~mL}=1 \mathrm{~cm}^{3}$
$1 \mathrm{~L}=1000 \mathrm{~cm}^{3}$
$1 \mathrm{~m}^{3}=1000 \mathrm{~L}$

## Imperial conversions

1 gallon $\doteq 277.42$ cubic inches
1 cubic foot $\doteq 6.2288$ gallons
Imperial to metric Metric to imperial
1 fluid ounce $\doteq 28.4131 \mathrm{~mL} \quad 1 \mathrm{~mL} \doteq 0.0352$ fluid ounce
1 pint $\doteq 0.5683 \mathrm{~L} \quad 1 \mathrm{~L} \doteq 1.7598$ pints
1 quart $\doteq 1.1365 \mathrm{~L} \quad 1 \mathrm{~L} \doteq 0.8799$ quart
1 gallon $\doteq 4.5461 \mathrm{~L} \quad 1 \mathrm{~L} \doteq 0.2200$ gallon
1 gallon $\doteq 4546.1 \mathrm{~cm}^{3}$
1 U.S. gallon $\doteq 3.785 \mathrm{~L}$

## Other units

## Area

$1 \mathrm{ha}=10000 \mathrm{~m}^{2}$
1 acre $=43560$ square feet

## Mass

$1 \mathrm{mg}=1000 \mu \mathrm{~g}$
$1 \mathrm{~kg}=1000 \mathrm{~g} \quad 1 \mathrm{~g}=0.001 \mathrm{~kg}$
$1 \mathrm{t}=1000 \mathrm{~kg}$
Time
$1 \mathrm{~h}=60 \mathrm{~min}$

## Course Study Guide continued

## Sum of the Angles in a Triangle

In any $\triangle \mathrm{ABC}$ :

$\angle \mathrm{A}+\angle \mathrm{B}+\angle \mathrm{C}=180^{\circ}$

## Pythagorean Theorem

In right $\triangle \mathrm{ABC}$ with
hypotenuse $c$ :
$c^{2}=a^{2}+b^{2}$

## Primary Trigonometric Ratios

When $\angle \mathrm{A}$ is an acute angle in a right triangle:

$\sin \mathrm{A}=\frac{\text { length of side opposite } \angle \mathrm{A}}{\text { length of hypotenuse }}$
$\cos \mathrm{A}=\frac{\text { length of side adjacent to } \angle \mathrm{A}}{\text { length of hypotenuse }}$
$\tan \mathrm{A}=\frac{\text { length of side opposite } \angle \mathrm{A}}{\text { length of side adjacent to } \angle \mathrm{A}}$

## Trigonometric Ratios of Supplementary Angles

For an acute angle, A , and its supplementary obtuse angle, $\left(180^{\circ}-\mathrm{A}\right)$ :
$\sin \mathrm{A}=\sin \left(180^{\circ}-\mathrm{A}\right)$
$\cos A=-\cos \left(180^{\circ}-A\right)$
$\tan \mathrm{A}=-\tan \left(180^{\circ}-\mathrm{A}\right)$

## Sine Law

In any $\triangle \mathrm{ABC}$ :
$\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$

## Cosine Law

In any $\triangle \mathrm{ABC}$ :

$c^{2}=a^{2}+b^{2}-2 a b \cos C$

## Area and Perimeter (Circumference)

Square:

$$
\begin{aligned}
& A=s^{2} \\
& P=4 s
\end{aligned}
$$

Rectangle:

Triangle:

Parallelogram: $\quad A=b h$

$$
P=2 b+2 c
$$

Trapezoid:

Circle:

$$
\begin{aligned}
& A=\pi r^{2} \\
& C=2 \pi r
\end{aligned}
$$

## Volume and Surface Area

Cube:

$$
\begin{aligned}
& V=s^{3} \\
& S A=6 s^{2}
\end{aligned}
$$

Sphere:

$$
V=\frac{4}{3} \pi r^{3}
$$

Prism or cylinder: $\quad V=$ base area $\times$ height

Pyramid or cone: $\quad V=\frac{1}{3} \times$ base area $\times$ height

## Statistical Measures

For a set of numbers:
Mean: $\frac{\text { sum of values }}{\text { number of values }}$
Median or second quartile: middle value or average of two middle values
Mode: most common value
Range: greatest value - least value
Lower quartile or first quartile: median of values less than second quartile
Upper quartile or third quartile: median of values greater than second quartile
Percentile: tells the approximate percent of numbers less than a given value

## Properties of Lines and Curves

Slope of a line $=\frac{\text { rise }}{\text { run }}$
Average rate of change $=\frac{\text { Change in dependent variable }}{\text { Change in independent variable }}$

## Equations

Linear: $y=m x+b$
Quadratic: $y=a x^{2}+b x+c$
Exponential: $y=a b^{x}$

## Exponents

## Definitions

Positive integer exponents:

$$
a^{n}=\frac{a \times a \times a \times \cdots \times a}{n \text { factors }}
$$

Zero exponents:

$$
a^{0}=1, a \neq 0
$$

Negative exponents:

$$
a^{-n}=\frac{1}{a^{n}}, a \neq 0
$$

Rational exponents:

$$
\begin{aligned}
& a^{\frac{1}{n}}=\sqrt[n]{a}, a>0 \text { if } n \text { is even } \\
& a^{\frac{m}{n}}=(\sqrt[n]{a})^{m}=\sqrt[n]{a^{m}}, a>0 \text { if } n \text { is even }
\end{aligned}
$$

## Laws of Exponents

Multiplication law: $a^{m} \times a^{n}=a^{m+n}$
Division law:

$$
a^{m} \div a^{n}=a^{m-n}, a \neq 0
$$

Power of a power law: $\left(a^{m}\right)^{n}=a^{m n}$

## Common Payment Periods

Frequency
Annually
Semi-annually
Quarterly
Bi-monthly
Monthly
Semi-monthly
Bi-weekly
Weekly
Daily

Meaning | Number of payments |
| :---: |
| in one year |

every year 1
every 6 months $\quad 2$
every 3 months $\quad 4$
every 2 months $\quad 6$
every month 12
twice a month 24
every 2 weeks 26
every week 52
every day 365

## Ordinary Simple Annuity

Amount: $\quad A=\frac{R\left[(1+i)^{n}-1\right]}{i}$
Present value: $P V=\frac{R\left[1-(1+i)^{-n}\right]}{i}$

- $A$ is the amount in dollars
- $P V$ is the present value in dollars
- $R$ is the regular payment in dollars
- $i$ is the interest rate per compounding period as a decimal
- $n$ is the number of compounding periods

## Mortgages

In Canada, the interest rate on mortgages can be compounded at most semi-annually. However, mortgage payments are usually made monthly or bi-weekly.

Accelerated bi-weekly payment:
$\frac{1}{2}$ of the monthly payment
Accelerated weekly payment:
$\frac{1}{4}$ of the monthly payment

## TVM Solver

## Variables

N Total number of payments
I\% Annual interest rate as a percent
PV Principal or present value
PMT Regular payment
FV Amount or future value
P/Y Number of payments per year
C/Y Number of compounding periods per year
PMT: Indicates whether payments are made at the beginning or end of the payment period

Use the $\Sigma$ Int command to determine the total interest paid or earned.
